RE: Update on Non-IDOE Data Reports from Schools

MEMORANDUM

State Board of Education Staff have received the following updates from Indiana State Police and Indiana Department of Workforce Development.

Indiana State Police:

"Our Major White confirmed with the Clearinghouse our (ISP) thoughts regarding the two reports. Please see the notes below relative the ISP Data Collection Reporting:

- *Birth Record Reports: IC 20-33-2-10 (required to be submitted by a school within 30 days of enrollment).*
 - We suggest that this IC is kept with respect to the language on reporting to ISP. It has a useful purpose.
- *Unknown Location of Student Report: IC 20-26-13-10 (requirement for submission determined by Dept. of Education).*
 - We suggest that this IC is repealed (language with respect to reporting to ISP). The protocol was revamped in the last year or so, however, the requirement causes confusion within the school systems. Without a statewide repository of students the names are sent into us when in fact they either transferred to another school or they began homeschooling."

Indiana Department of Workforce Development

Indiana Department of Workforce Development (DWD) collects CTE information from schools and career centers to help with the CTE funding formula. DWD also collects information on dual credit courses that is needed for federal reporting. All of this data reporting is necessary as it's connected to funding and federal reporting. There may, however, be an opportunity to streamline DWD and the Indiana Department of Education's dual credit data collections.
